IIIT Style-Sheet: A Guide for Authors, Translators, and Copy-Editors 2002 "This is a concise guide for authors, translators, revisers, copy-editors and proof-readers involved in the production of manuscripts for publication. A brief overview of successive stages in the production process is given along with guidelines on how to prepare and submit work. The Guide also contains: pointers on grammar, and American-English punctuation and spelling; instructions on citing references and bibliographical information; guidelines on transliterating Arabic terms and phrases; tips on capitalization, especially in relation to Arabic terminology. The Guide as a whole is the outcome of consultations among people with many years of experience in preparing works for publication. In addition to offering sound advice on dealing with some of the common difficulties and problems encountered in translating material from Arabic into English, it also highlights a strategy for translation and defines the task of the author, translator and copy-editor." --

The Power of Stars Bryan E. Penprase 2010-10-17 What are some of the connections that bind us to the stars? How have these connections been established? And how have people all around the world and throughout time reacted to the night sky, the sun and moon, in their poetry, mythology, rituals, and temples? This book explores the influence of the sky on both ancient and modern civilization, by providing a clear overview of the many ways in which humans have used the stars as an ordering principle in their cultures, and which today still inspire us intellectually, emotionally, and spiritually. The book explores constellation lore from around the world, celestial alignments of monuments and temples, both from ancient and modern civilizations, and the role the sky has played in the cultures of the Greek, Egyptian,

Babylonian, Native American, Chinese, Mayan, Aztec, and Inca. Models of the universe from each of these cultures are described clearly, and each culture's explanation of the stars, planets, and other celestial objects are described. The roots of astronomy and astrology are presented with original imagery and reproductions of ancient manuscripts that portray the structure of the physical universe as conceived by a diverse array of human cultures over the centuries. Our own scientific Big Bang cosmology and the origin of stars and elements are discussed in a philosophical context, to explore how we as modern people learn about the Universe, and incorporate the findings of science into our world views. A concluding chapter provides a summary of modern science's effort to unlock the celestial secrets from the sky and from past civilizations, and what these answers mean for us today.

The Emperor's Mirror Russell J. Barber 1998-10 Russell J. Barber and Frances F. Berdan have created the ultimate guide for anyone doing cross-cultural and/or document-driven research. Presenting the essentials of primary-source methodology, *The Emperor's Mirror* includes nine chapters on paleography, calendrics, source and quantitative analysis, and the visual interpretation of artifacts such as pictographs, illustrations, and maps. As an introduction to ethnohistory, this book clearly defines terminology and provides practical and accessible examples, effectively integrating the concerns of historians and anthropologists as well as addressing the needs of anyone using primary sources for research in any academic field. A leading theme throughout the book is the importance of a researcher's awareness of the inherent biases of documents while doing research on another culture. Documents are the result of people interpreting reality through the filter of their own experience, personality, and culture. Barber and Berdan's reality mediation model shows students how to analyze documents to detect the implicit biases or subtexts inherent in

primary-source materials. Students and scholars working with primary sources will particularly appreciate the case studies that Barber and Berdan use to illustrate the practical implications of using each methodology. These case studies not only apply method to actual research but also are fascinating in their own right: they range from a discussion of the debate over Tupinamba cannibalism to the illustration of Nahuatl, Spanish, and hybrid place names of Tlaxcala, Mexico.

Calendrical Calculations Millennium Edition Edward M. Reingold 2001-08-06 This new edition of the successful calendars book is being published at the turn of the millennium and expands the treatment of the previous edition to new calendars and variants. As interest grows in the impact of seemingly arbitrary calendrical systems upon our daily lives, this book frames the world in a completely algorithmic form. The book gives a description of twenty-five calendars and how they relate to one another: the Gregorian (current civil), ISO (International Organization for Standardization), Egyptian (and nearly identical Armenian), Julian (old civil), Coptic, Ethiopic, Islamic (Moslem), modern Persian (both astronomical and arithmetic forms), Baha'i (both present and future forms), Hebrew (Jewish), Mayan (long count, haab, and tzolkin), Balinese Pawukon, French Revolutionary (both astronomical and arithmetic forms), Chinese (and nearly identical Japanese), old Hindu (solar and lunisolar), and modern Hindu (solar and lunisolar). Easy conversion among these calendars is a by-product of the approach, as is the determination of secular and religious holidays. *Calendrical Calculations* makes accurate calendrical algorithms readily available for computer use with LISP, Mathematica, and Java code for all the algorithms included on the CD, and updates are available on the Web. This book will be a valuable resource for working programmers as well as a fount of useful algorithmic tools for computer scientists. In addition, the lay reader will find

the historical setting and general calendar descriptions of great interest.

Terrorism and Organized Hate Crime

Michael R. Ronczkowski 2011-09-21 The ability of law enforcement agencies to manage intelligence is key to fighting the war on terror, and a critical foundation of intelligence-led policing is proper analysis of the information gained. *Terrorism and Organized Hate Crime: Intelligence Gathering, Analysis, and Investigations*, Third Edition provides a methodical approach to analyzing homeland security needs, enabling the law enforcement community to understand the vital role it plays in the war on terrorism. Using techniques applicable to the private and the public sector, the book combines academic, research, and practitioner perspectives to establish a protocol for effectively gathering, analyzing, investigating, and disseminating criminal intelligence. The book demonstrates how to recognize the indicators of an impending act of terrorism or mass violence, how to deter an attack, and how to transform information into intelligence to meet community demands for safety and security. New chapters in this third edition focus on source development and their use in investigations, the role of fusion centers, terrorism financing, the handling of classified materials, and the National Suspicious Activity Reporting (SAR) Initiative. The book also discusses pre-incident indicators, the radicalization process, and behavioral traits associated with terrorism. A one-stop resource for the homeland security, intelligence analyst, and investigative professional, this volume arms those tasked with protecting the public with a solid blueprint for combating and investigating crimes associated with terrorism and hate.

The Far East and Australasia 2001

Europa Publications 2001 A systematic survey of the political, social and economic aspects of a changing region, this resource covers all the countries in East Asia, South East Asia, Australasia and the Pacific Islands, from Afghanistan to Vietnam. *Ugliness* Gretchen E. Henderson 2015-11-15 Ugly as sin, the ugly duckling—or maybe you fell out of the ugly tree? Let's face it, we've all used the word "ugly" to describe someone we've seen—hopefully just in our private thoughts—but have we ever considered how slippery the term can be, indicating anything from the slightly unsightly to the downright revolting? What really lurks behind this most favored insult? In this actually beautiful book, Gretchen E. Henderson casts an unfazed gaze at ugliness, tracing its long-standing grasp on our cultural imagination and highlighting all the peculiar ways it has attracted us to its repulsion. Henderson explores the ways we have perceived ugliness throughout history, from ancient Roman feasts to medieval grotesque gargoyles, from Mary Shelley's *Frankenstein* to the Nazi Exhibition of Degenerate Art. Covering literature, art, music, and even the cutest possible incarnation of the term—Uglydolls—she reveals how ugliness has long posed a challenge to aesthetics and taste. She moves beyond the traditional philosophic argument that simply places ugliness in opposition to beauty in order to dismantle just what we mean when we say "ugly." Following ugly things wherever they have trod, she traverses continents and centuries to delineate the changing map of ugliness and the profound effects it has had on the public imagination, littering her path with one fascinating tidbit after another. Lovingly illustrated with the foulest images from art, history, and culture, *Ugliness* offers an oddly refreshing perspective, going past the surface to ask what "ugly" truly is, even as its meaning continues to shift.

The Eye of the Storm Salidor Christoffel Coetzee 2021-03-02 A Quest for Truth This book is dedicated to the world's most vulnerable people who suffer from atrocities stemming from wars, poverty, addictions, and foremost those who were infected by or died because of the COVID-19 coronavirus. A virus that was created in and originating from China, Wuhan City in the Hubei province. The virus spread rapidly, creating immense havoc across the globe, sparing no country or human being, a virus without borders, with devastating effects. It is time for introspection and reflection, a time for a psychological and spiritual makeover, time to remove idols from our midst and honour one God, the God of Adam and Eve, God of Abraham, Sarah,

Hagar, Ishmael and Isaac, God the oneness. The story of Abraham is retold in the book from a Christian biblical perspective, but more so from a Muslim belief, the Quran perspective, a constructive attempt to align and bridge the divides between nations during these difficult, testing times. Through the book, the author fulfils that commitment and promise made as a young boy to God, to spread God's message of hope and love into the world, to bridge the cultural divide, to promote care for the poor and homeless. Similar to the COVID-19 coronavirus, God's grace, love, and forgiveness have no borders. The world is in desperate need of spiritual cure and revival, across borders. It is a world in constant chaos and turmoil instigated and promulgated by politicians, and business and country leaders' ethical misbehaviour across the globe, hearts and minds contaminated by a deadly infected 'cancerous' disease for example lust, arrogance, and greed, fraudulent and corrupt hearts and minds, an extremism philosophy and theology in its own right. The author sadly lost his wife in 2010 due to breast cancer. In 2011, he was on the verge of becoming a tramp in the streets of South Africa. Yes, a highly qualified individual with years of experience as a financial manager in a big corporate company, with 8 years high-level academic accomplishments. If people ask him, 'How was it possible?' he will tell them it is very possible; it all depends on every individual's personal circumstances. God the Oneness knows every hair on your head, He loves and cares about you anyway, wherever and whatever you are. The author lived and worked for seven years of his career as a cost engineer for a large oil-and-gas company in Saudi Arabia. He also previously worked as financial manager for a joint-venture oil-and-gas company in Iran, Arya Sasol Polymer Company (ASPC), a joint-venture company with 50 per cent ownership from oil-and-gas company National Petroleum Company (NPC), Iran and 50 per cent ownership from

oil-and-gas company Sasol South Africa. Both companies were represented on the ASPC board by three directors, respectively. He had the joy and fulfilment of visiting many countries during his short life, apart from working and living in Saudi Arabia and Iran. A journey always has a starting and a finishing point, starting life from fertilisation to an unborn fruit in the womb of your mother until you pass on to something much bigger and better, eternal life, heavenly freedom and peace in the presence of God, the Creator and oneness. In the book, Saudi Arabia and Iran are extensively discussed to provide insight to the reader. The two countries are uniquely different, but in many ways the same. The author attempts to give the reader a glimpse of life as an expatriate worker in both countries, Saudi Arabia and Iran—a journey never to forget or to regret, a humble, faithful, committed contribution to mankind, in a dynamic and diverse way, in a dynamic and diverse multicultural environment. In some instances, the author feels obliged to speak the truth, and only the truth, because truth matters, for the sake of reflection, admission, repentance, and necessary corrective action by business leaders, politicians, and governments alike, to take a leaf from the author's book of life. The Leadership Challenge are discussed, using Nelson Mandela, a previous president of South Africa as an example to explain the concept of Servant leadership. Few images in history are more powerful than that of Nelson Mandela, fist raised in a dignified grey suit, walking after his release from 27 years of imprisonment, his short walk to freedom. Mandela was only 44 years old when he was given a life sentence by the apartheid regime for his leadership of the African National Congress, an organisation outlawed by the South African government for its anti-apartheid actions and positions. After providing the reader with evidential background, the last two chapters deal with the author's personal experiences in Iran and Saudi Arabia respectively, two

countries that are way apart from each other. The two countries, apart from being constantly in conflict with each other, are also in conflict with other countries, because of their deeply rooted differences in religion and cultures, but more so because of their greed and love for oil, or black gold. They are ways apart and indifferent, but with so much in common.

Essential Hindi Grammar Christine Everaert 2017-03-30 This is a comprehensive grammar of Modern Standard Hindi, the primary language spoken by more than 420 million people in India. Because each grammatical topic is thoroughly illustrated with basic examples and more complex ones from modern Hindi short stories, it can be used as a reference and supplementary grammar to any textbook from beginning to advanced levels. Its approach is efficient and effective and will be appreciated by students learning written and spoken Hindi in the classroom or independently, as well as by those wanting to read literary Hindi or teach it as a second language at the college level. Its appealing examples will enhance even heritage learners' cultural knowledge of Hindi literature. Essential Hindi Grammar will draw in students who are new to language learning. Grammatical concepts are introduced and fully explained; basic grammatical terminology is presented in plain language but without over-simplifying material for more advanced learners. Numerous user-friendly tables accompany grammatical explanations. One of the benefits of the volume is its extensive coverage of abstract structures of the modern standard language. Drawing examples from Hindi literature, it combines the study of language with that of literature and literary culture—a rare approach to language acquisition. Scientific transliteration is provided consistently throughout the book, wherever Hindi in Devanagari is given. Essential Hindi Grammar is a solid addition to existing Hindi pedagogical materials and will assist those engaged in the acquisition of the language throughout the

Anglophone world.

Configuring Microsoft Outlook 2003

Sue Mosher 2005-09-23 One of the challenges of administering and supporting Microsoft® Outlook 2003 is that it stores settings in so many different places - in the Windows registry, as files in the user's profile folders, and in the information store itself. Configuring Microsoft® Outlook 2003 pulls together in one volume the information that administrators in organizations of all sizes need to understand, deploy, and manage settings for Microsoft Outlook 2003. It covers configuration issues for environments where Microsoft Exchange is the mail server and also for those using IMAP4 or POP3. The book gives special attention to security issues, including recommended configuration of Outlook's built-in security features and methods for locking down Outlook with Group Policy Objects and other techniques. Configure the new Cached Exchange mode and RPC over HTTP connections in Outlook 2003 Discover undocumented settings for Microsoft Exchange Server and use them to deploy or modify Outlook mail profiles Migrate both user data and settings to a new machine Use tools such as MFCMAPI and Outlook Spy to explore Outlook's data and settings Configure an archive .pst file in the new Unicode format that supports up to 20GB of data Use scripts to handle challenging configuration tasks such as granting Reviewer access to a Calendar folder, or adding a second Exchange mailbox to an Outlook profile

Corpus Inscriptionum Arabicarum Palaestinae, Volume Seven: J (2)

Jerusalem 1 Moshe Sharon 2021-04-26

The religious and strategic importance of Western Palestine in the Islamic period is clearly reflected in the hundreds of Arabic

inscriptions found, the texts of which cover a variety of topics including construction, dedication, religious endowments, epitaphs, Qur'anic texts, prayers and invocations, all now assembled in this Corpus Inscriptionum Arabicarum Palaestinae (CIAP). The inscriptions are arranged according to site, and are studied in their respective topographical, historical and cultural contexts. In this way the Corpus offers more than a survey of inscriptions: it represents the epigraphical angle of the geographical history of the Holy Land under Islam.

Global Sales and Contract Law

Ingeborg Schwenzer 2012-01-26

Although the 1980 United Nations Convention on Contracts for the International Sale of Goods (CISG) is one of the most successful international conventions to date, it remains the case that those involved in the international sale of goods must refer to a multitude of laws. Indeed the CISG itself does not cover all issues relating to international sales contracts, so it must necessarily be supplemented by domestic law. Global Sales and Contract Law provides a truly comparative analysis of domestic laws in over sixty countries so as to deliver a global view of domestic and international sales law. The book reports on the real practice of sales law, taking into account present day problems. Complex questions on the obligations under a sales contract, the ways in which these are established, as well as the remedies following the breach of obligations, are all discussed. By addressing regional uniform projects, like OHADA, and comparing differences in domestic legal approach where the CISG would not apply, the work goes beyond existing commentaries which tend to focus only on the CISG. The analysis has been based on an unprecedented survey drawn from the world's top fifty companies as well as international traders, lawyers advising international traders, arbitral institutions, arbitrators, and law schools. This work encompasses all aspects of a sale of

goods transaction and takes a wide view of sale by including general contract law. The book gives practitioners invaluable insight into judicial trends and possible solutions in different legal systems, whether preparing for litigation or drafting an international contract. *Global Sales and Contract Law* is the most comprehensive and thorough compilation of legal analysis in the field of the sale of goods and is a reliable source for any practitioner dealing in international commerce. *The World Almanac and Book of Facts 2021* Sarah Janssen 2020-12-15 #1 New York Times Bestseller! Theological Studies, Second Edition
Cyril Orji 2021-01-07 An Introduction to Religious and Theological Studies walks students through topical issues to be encountered in the study of the Abrahamic religions: Judaism, Christianity, and Islam as these religions encounter other religions in the context of the wider ecumenism. The text is written from a Christian point of view and aims at helping students understand that to be Christian is to be ecumenical. African Traditional Religions (ATRs) has been included in this survey to provide background for the religious traditions and cultures of peoples of Africa as Christianity moves inexorably southward. The book has been written with undergraduate general education students in mind—including meeting the needs of those in seminaries and theological institutes.

Palestinian Islamic Jihad Erik Skare 2021-07-15 Founded in 1981, Palestinian Islamic Jihad (PIJ) is one of the most important yet least understood Palestinian armed factions, both in terms of its history and ideology. Yet no in-depth translation of its ideological corpus

exists. This book is the first to provide a comprehensive account of the ideology of PIJ in the movement's own words. Based on the author's extensive fieldwork and archival research in the occupied Palestinian territories and Lebanon, the book comprises the PIJ's written texts produced since 1979, translated here into English for the first time. In addition to the primary texts, the book includes expert commentary from the author for each source to help explain the context and the broader significance of the documents. The key contention of the book is that although PIJ employs Islamic signifiers and symbolism, its ideology is strikingly similar to the anti-colonialism of the PLO in the 1960s, and in stark contrast to Hamas. A comprehensive resource on the PIJ, it covers:

- PIJ beliefs about the Palestinian problem
- what type of Islamism the PIJ espouses
- how the PIJ regards Shiites and Iran
- how it can be understood as an Islamist organization
- what it envisions for Palestinian society in the future

This is the only sourcebook available on the PIJ.

Indonesian Manuscripts from the Islands of Java, Madura, Bali and Lombok Th.C. van der Meij 2017-07-31 Indonesian Manuscripts from the Islands of Java, Madura, Bali and Lombok is an original, pioneering, and richly illustrated work that discusses hitherto unaddressed features of manuscript traditions of these islands. The extensive description of palm-leaf manuscripts in particular opens up avenues for further study.

Saudi Arabia 1984
Year of the Locust Salim Tamari 2015-08-18 Year of the Locust captures in page-turning detail the end of the Ottoman world and a pivotal moment in Palestinian history. In the diaries of Ihsan Hasan al-Turjman (1893-1917), the first ordinary recruit to describe World War I from the Arab side, we follow the misadventures of an Ottoman soldier stationed in Jerusalem. There he occupied himself by dreaming about his future and using family connections to avoid

being sent to the Suez. His diaries draw a unique picture of daily life in the besieged city, bringing into sharp focus its communitarian alleys and obliterated neighborhoods, the ongoing political debates, and, most vividly, the voices from its streets—soldiers, peddlers, prostitutes, and vagabonds. Salim Tamari's indispensable introduction places the diary in its local, regional, and imperial contexts while deftly revising conventional wisdom on the disintegration of the Ottoman Empire.

Astronomy in the Ancient World Alexus McLeod 2016-06-17 Alexus McLeod explores every aspect of the lesser-known history of astronomy in the Americas (Mesoamerica and North America), China and India, each through the frame of a particular astronomical phenomena. Part One considers the development of astronomy in the Americas as a response, in part, to the Supernova of 1054, which may have led to a cultural renaissance in astronomy. He then goes on to explore the contemporary understanding of supernovae, contrasting it with that of the ancient Americas. Part Two is framed through the appearances of great comets, which had major divinatory significance in early China. The author discusses the advancement of observational astronomy in China, its influence on politics and its role in the survival or failure of empires. Furthermore, the contemporary understanding of comets is also discussed for comparison. Part Three, on India, considers the magnificent observatories of the Rajput king Jai Singh II, and the question of their purpose. The origins of Indian astronomy are examined in Vedic thought and its development is followed through the period of Jai Singh, including the role played by solar eclipses. The author also includes a modern explanation of our understanding of eclipses to date. In the final section of the book, McLeod discusses how ancient traditions might help modern civilization better understand Earth's place in the cosmos.

Soviet Policy in Xinjiang Jamil Hasanli 2020-12-03 Using recently declassified Soviet documents, Jamil Hasanli examines Soviet involvement in the anti-China rebellion in East Turkistan. Hasanli takes readers back to the early 1930s when the Turkic national movement was suppressed by the Soviet government and the USSR. Hasanli deftly illustrates how Stalin's policies toward the movement changed after the turning point of World War II and the treachery of

Sheng Shicai, leading up to the 1944 establishment of the Eastern Turkistan Republic and the start of the Cold War.
