*African Political Thought* G. Martin 2012-12-23 Focusing on individual political thinkers and beginning with indigenous African political thought, the book successively examines African nationalism, African socialism, populism and Marxism, Africanism and pan-Africanism, concluding with contemporary perspectives on democracy, development and the African state.

**A New Paradigm of the African State** Mueni wa Muiu 2009-02-13 This book takes a multidisciplinary and long-term historical perspective to study the evolution of African political systems and institutions. It ranges from Antiquity (Egypt, Kush, and Axum) to the present, with a particular focus on the destruction of these political systems and institutions through successive exogenous processes, including the Atlantic slave trade, imperialism, colonialism, and neo-colonialism or globalization.

[The Roman Empire and the Indian Ocean](#) Raoul McLaughlin 2014-09-11 The ancient evidence suggests that international commerce supplied Roman government with up to a third of the revenues that sustained their empire. In ancient times large fleets of Roman merchant ships set sail from Egypt on voyages across the Indian Ocean. They sailed from Roman ports on the Red Sea to distant kingdoms on the east coast of Africa and the seaboard off southern Arabia. Many continued their voyages across the ocean to trade with the rich kingdoms of ancient India. Freighters from the Roman Empire left with bullion and returned with cargo holds filled with valuable trade goods, including exotic African products, Arabian incense and eastern spices. ??This book examines Roman commerce with Indian kingdoms from the Indus region to the Tamil lands. It investigates contacts between the Roman Empire and powerful African kingdoms, including the Nilotic regime that ruled Meroe and the rising Axumite Realm. Further chapters explore Roman dealings with the Arab kingdoms of south Arabia, including the Saba-Himyarites and the Hadramaut Regime, which sent caravans along the incense trail to the ancient rock-carved city of Petra.??The Roman Empire and the Indian Ocean is the first book to bring these subjects together in a single comprehensive study that reveals Rome's impact on the ancient world and explains how international trade funded the Legions that maintained imperial rule. It offers a new international perspective on the Roman Empire and its legacy for modern society.

[Ancient Civilizations of Africa](#) G. Mokhtar 1981-01-01 Deals with the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some 9,000 years of history has been sub-divided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later called the Magrhib and its Saharan hinterland.

Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.--Publisher's description

**England's Other Countrymen** Onyeka Nubia 2019-06-15 The Tudor period remains a source of timeless fascination, with endless novels, TV programmes and films depicting the period in myriad ways. And yet our image of the Tudor era remains overwhelmingly white. This ground-breaking and provocative new book seeks to redress the balance: revealing not only how black presence in Tudor England was far greater than has previously been recognised, but that Tudor conceptions of race were far more complex than we have been led to believe. Onyeka Nubia's original research shows that Tudors from many walks of life regularly interacted with people of African descent, both at home and abroad, revealing a genuine pragmatism towards race and acceptance of difference. Nubia also rejects the influence of the 'Curse of Ham' myth on Tudor thinking, persuasively arguing that many of the ideas associated with modern racism are in fact relatively recent developments. England's Other Countrymen is a bravura and eloquent forgotten history of diversity and cultural exchange, and casts a new light on our own attitudes towards race.

**A History of Africa** Hosea Jaffe 2017-02-15 Spanning more than two thousand years of African history, from the African Iron Age to the collapse of colonialism and the beginnings of independence, Hosea Jaffe's magisterial work remains one of the few to do full justice to the continent's complex and diverse past. The great strength of Jaffe's work lies in its unique theoretical perspective, which stresses the distinctive character of Africa's social structures and historical development. Crucially, Jaffe rejects all efforts to impose Eurocentric models of history onto Africa, whether it be liberal notions of 'progress' or Marxist theories of class struggle, arguing instead that the key dynamics underpinning African history are unique to the continent itself, and rooted in conflicts between different modes of production. The work also includes a foreword by the distinguished economist and political theorist Samir Amin, in which he outlines the contribution of Jaffe's work to our understanding of African history and its ongoing post-colonial struggles.

**Aksum and Nubia** George Hatke 2013-01-07 Aksum and Nubia assembles and analyzes the textual and archaeological evidence of

interaction between Nubia and the Ethiopian kingdom of Aksum, focusing primarily on the fourth century CE. Although ancient Nubia and Ethiopia have been the subject of a growing number of studies in recent years, little attention has been given to contact between these two regions. Hatke argues that ancient Northeast Africa cannot be treated as a unified area politically, economically, or culturally. Rather, Nubia and Ethiopia developed within very different regional spheres of interaction, as a result of which the Nubian kingdom of Kush came to focus its energies on the Nile Valley, relying on this as its main route of contact with the outside world, while Aksum was oriented towards the Red Sea and Arabia. In this way Aksum and Kush coexisted in peace for most of their history, and such contact as they maintained with each other was limited to small-scale commerce. Only in the fourth century CE did Aksum take up arms against Kush, and even then the conflict seems to have been related mainly to security issues on Aksum's western frontier. Although Aksum never managed to hold onto Kush for long, much less dealt the final death-blow to the Nubian kingdom, as is often believed, claims to Kush continued to play a role in Aksumite royal ideology as late as the sixth century. Aksum and Nubia critically examines the extent to which relations between two ancient African states were influenced by warfare, commerce, and political fictions. Online edition available as part of the NYU Library's Ancient World Digital Library and in partnership with the Institute for the Study of the Ancient World (ISAW).

**From Slave to Pharaoh** Donald B. Redford 2004-08-06 In From Slave to Pharaoh, noted Egyptologist Donald B. Redford examines over two millennia of complex social and cultural interactions between Egypt and the Nubian and Sudanese civilizations that lay to the south of Egypt. These interactions resulted in the expulsion of the black Kushite pharaohs of the Twenty-fifth Dynasty in 671 B.C. by an invading Assyrian army. Redford traces the development of Egyptian perceptions of race as their dominance over the darker-skinned peoples of Nubia and the Sudan grew, exploring the cultural construction of spatial and spiritual boundaries between Egypt and other African peoples. Redford focuses on the role of racial identity in the formulation of imperial power in Egypt and the legitimization of its sphere of influence, and he highlights the dichotomy between the Egyptians' treatment of the black Africans it deemed enemies and of those living within Egyptian society. He also describes the range of responses—from resistance to assimilation—of subjugated Nubians and Sudanese to their loss of self-determination. Indeed, by the time of the Twenty-fifth Dynasty, the culture of the Kushite kings who conquered Egypt in the late eighth century B.C. was thoroughly Egyptian itself. Moving beyond recent debates between Afrocentrists and their critics over the racial characteristics of Egyptian civilization, From Slave to Pharaoh reveals the true complexity of race, identity, and power in Egypt as documented through surviving texts and artifacts, while at the same time providing a compelling account of war, conquest, and culture in the ancient world.

[Africa](#) Jeremy I Levitt 2008-03-31 The principal aim of this work is to provide a forum for leading international lawyers with experience and interest in Africa to address a broad range of intellectual challenges concerning the contribution of African states and peoples to international law. As such, the volume addresses orthodox topics of international law - such as jurisdiction and intervention - but tackles them from an African perspective, and seeks to ask whether, in each case, the African perspective is unique or affirms existing arrangements of international law. The book cannot come at a more important time. While international legal discourse has been captured by the challenge of terrorism since September 11, 2001, there are clear signs that other issues are returning to the fore. Political interest in Africa has undergone a global revival, and the OAU has been transformed into the African Union. Infrastructural challenges, along with those taking place in regional contexts, have effectively mapped a new politico-legal landscape for Africa. This, and more, is explored, and the key normative questions are addressed in a series of essays by leading Africanist scholars. 'This is a remarkable collection of essays that clearly and concisely demonstrates that Africa has and will continue to play a major role in fashioning new norms of international law and policy and contribute to its progressive development by affirming existing norms. Professor Levitt is to be commended for having the vision, leadership and intellectual prowess to produce this excellent text. The book signals a major shift from the study of Africa as a basket case to a normative market place.' Akua Kuenyehia, Vice President, International Criminal Court 'Professor Levitt's work, Africa: Mapping New Boundaries in International Law, is pathbreaking in the true sense of that word. Through old and new voices, it excavates the singular contributions of Africa to a discipline that is marked by Eurocentrism and imperial aspirations. The authors, taking their cue from the indefatigable and insightful Professor Levitt, establish beyond a shadow of a doubt the enormity of the normative contributions that Africa has made to international law. The book must therefore be seen as a defining contribution to the multiculturalization of international law. It is for this reason that Professor Levitt is among the most important American academics working and thinking in international law today.'

[The History and Geography of Human Genes](#) Luigi Luca Cavalli-Sforza 2018-06-05 Hailed as a breakthrough in the understanding of human evolution, *The History and Geography of Human Genes* offers the first full-scale reconstruction of where human populations originated and the paths by which they spread throughout the world. By mapping the worldwide geographic distribution of genes for over 110 traits in over 1800 primarily aboriginal populations, the authors charted migrations and devised a clock by which to date evolutionary history. This monumental work is now available in a more affordable paperback edition without the myriad illustrations and maps, but containing the full text and partial appendices of the authors' pathbreaking endeavor.

*The Oxford History of Ancient Egypt* Ian Shaw 2003-10-23 The Oxford History of Ancient Egypt describes the emergence and development of the distinctive civilization of the ancient Egyptians, from their prehistoric origins to their conquest by the Persians, Greeks, and Romans. Included are the most detailed examinations of the three so-called 'intermediate periods' in Egyptian history, which were previously regarded as 'dark ages' but are now beginning to be better understood.

**Zero Hour: A Countdown to the Collapse of South Africa's Apartheid System** Geoffrey Hebdon 2022-07-15 This enlightening book focuses on the history of how the ethnic groups of Africa, eventually joined by white colonizers from Europe, created the seedbed for the hateful apartheid system in Southern Africa. The reader learns how apartheid began, the dehumanizing effects it had on the black population, and how it was finally abolished in its 'zero hour' in 1994. Written by historian, writer and researcher Geoffrey Hebdon, this is

the second in a series that covers the experience of a British citizen who emigrated to South Africa during that era, and records in vivid detail his responses to the apartheid system and how South Africa and neighbouring countries evolved after apartheid was abolished. As well as the first European settlers and the white Afrikaners' attempted enslavement of the black population, the book also covers the Zulu wars, the Anglo-Boer wars and individuals who supported apartheid such as Cecil Rhodes and the whites-only National Party of South Africa. Also covered are prominent leaders of the African National Congress (ANC) and the black revolutionaries who fought against apartheid, many of whom gave their lives or served life sentences for their "struggle", including Nelson Mandela, who became South Africa's first black president after serving years in prison.

**Toponymy on the Periphery** Julien Cooper 2020-08-03 "In *Toponymy on the Periphery*, Julien Charles Cooper conducts a study of the rich geographies preserved in Egyptian texts relating to the desert regions east of Egypt. These regions, filled with mines, quarries, nomadic camps, and harbours are often considered as an unimportant hinterland of the Egyptian state, but this work reveals the wide explorations and awareness Egyptians had of the Red Sea and its adjacent deserts, from the Sinai in the north to Punt in the south. The book attempts to locate many of the placenames present in Egyptian texts and analyse their etymology in light of Egyptian linguistics and the various foreign languages spoken in the adjacent deserts and distant shores of the Red Sea"--

**The Curse of Ham** David M. Goldenberg 2009-04-11 How old is prejudice against black people? Were the racist attitudes that fueled the Atlantic slave trade firmly in place 700 years before the European discovery of sub-Saharan Africa? In this groundbreaking book, David Goldenberg seeks to discover how dark-skinned peoples, especially black Africans, were portrayed in the Bible and by those who interpreted the Bible--Jews, Christians, and Muslims. Unprecedented in rigor and breadth, his investigation covers a 1,500-year period, from ancient Israel (around 800 B.C.E.) to the eighth century C.E., after the birth of Islam. By tracing the development of anti-Black sentiment during this time, Goldenberg uncovers views about race, color, and slavery that took shape over the centuries--most centrally, the belief that the biblical Ham and his descendants, the black Africans, had been cursed by God with eternal slavery. Goldenberg begins by examining a host of references to black Africans in biblical and postbiblical Jewish literature. From there he moves the inquiry from Black as an ethnic group to black as color, and early Jewish attitudes toward dark skin color. He goes on to ask when the black African first became identified as slave in the Near East, and, in a powerful culmination, discusses the resounding influence of this identification on Jewish, Christian, and Islamic thinking, noting each tradition's exegetical treatment of pertinent biblical passages. Authoritative, fluidly written, and situated at a richly illuminating nexus of images, attitudes, and history, *The Curse of Ham* is sure to have a profound and lasting impact on the perennial debate over the roots of racism and slavery, and on the study of early Judaism, Christianity, and Islam.

[The Double Kingdom Under Taharqo](#) Jeremy W. Pope 2014-01-17 In *The Double Kingdom under Taharqo*, Jeremy Pope examines the strategies used by Taharqo, a Kushite pharaoh of ancient Egypt's Twenty-Fifth Dynasty, to govern Nubia and Egypt together during the seventh century BC.

**It's a Continent** Astrid Madimba 2022-07-07 Why is Africa still perceived as a country when there are around 2,000 languages spoken on the continent alone? IT'S A CONTINENT aims to counter the misconception that Africa is a country by breaking down this vast, beautiful and complex continent into regions and countries. Each of the 54 African countries has a unique history and culture, and this book highlights the key historical moments that have shaped each nation and contributed to its global position, as well as within the African continent. Each chapter (focusing on a different country) of the book brings to light stories and African figures that have been marginalised in mainstream education, in a humorous and easily-digestible format, breaking down facts and events that you wouldn't believe happened. Why is the Liberian flag so similar to the Stars and Stripes of the United States? Have you heard about Thomas Sankara's quest for Burkina Faso's self-sufficiency? African soldiers' contribution to World War II? There are many aspects of history that mainstream education doesn't address, and this book allows the reader to understand the consequences of historical colonial activities within the African Continent, and how many African countries continue to re-build. The majority of countries within the continent are young, not just in population but in age, as many only gained independence in the 20th Century. IT'S A CONTINENT is the bold and brilliant book for readers who want to gain an understanding of things you were never taught in school.
