*Development and Developing International and European Law* Konrad Ginther 1999 This book contains more than 40 contributions from academics, specialists and practitioners in International and European law as well as transnational constitutional law. The articles focus on recent developments in these fields and in particular on legal aspects of development. The book is dedicated to Konrad Ginther whose own academic research and work have always been devoted to new developments in international law and the shift of legal paradigms at universal and regional levels. International law in transformation and the right to (sustainable) development as a legal principle have been important aspects of his work. The contributions of his colleagues, friends and scholars, published in honour of his 65th birthday, reflect the interplay of theory, dogmatics and the practice of development in international, European and national constitutional law.

*The Principle of Loyalty in EU Law* Marcus Klamert 2014 The principle of loyalty requires the EU and its Member States to co-operate sincerely towards the implementation of EU law. Under the principle, the European courts have developed significant public law duties on States to deepen the reach of EU law. This is the first full-length analysis of the loyalty principle and its legal implications.

An important integral element of the Review is its digest of Austrian practice in public international law, encompassing both executive and judicial developments. *Backstage Practices of Transnational Law* Lianne J.M. Boer 2019-04-16 This book explores the 'backstage' of transnational legal practice by illuminating the routines and habits that are crucial to the field, yet rarely studied. Through innovative discussion of practices often considered trivial, the book encourages readers to conceptualise the 'backstage' as emblematic of transnational legal practice. Expanding the focus of transnational legal scholarship, the book explores the seemingly mundane procedures which are often taken for granted, despite being widely recognized as part of what it means to 'do transnational law'. Adopting various methodologies and approaches, each chapter focuses on one specific practice: for example, mooted exercises for law students, international travel, transnational time, the social media activities of lawyers and legal scholars, and the networking at the ICC's annual Assembly of States Parties. In and of themselves, these chapters each provide unique insights into what happens before the curtain rises and after it falls on the familiar 'outputs' of transnational law. It does more, however, than provide a range of different practices: it takes the next step in theorizing on the importance of the marginal and the everyday for what we 'know' to be 'the law' and what the international legal field looks like. Furthermore, by interrogating undiscussed academic practices, it provides students with a candid view on the perils and promises of transnational legal scholarship, inviting them to join the discussion and to practice their discipline in a more reflexive way. Written in an accessible format, containing a readable collection of personal and recognizable accounts of transnational legal practice, the book provides an everyday insight into transnational law. It will therefore appeal to international legal scholars, alongside any reader with an interest in transnational law.

**The Interception of Vessels on the High Seas** Efthymios Papastavridis 2014-08-28 The principal aim of this book is to address the international legal questions arising from the 'right of visit on the high seas' in the twenty-first century. This right is considered the most significant exception to the fundamental principle of the freedom of the high seas (the freedom, in peacetime, to remain free of interference by ships of another flag). It is this freedom that has been challenged by a recent significant increase in interceptions to counter the threats of international terrorism and WMD proliferation, or to suppress transnational organised crime at sea, particularly the trafficking of narcotics and smuggling of migrants. The author questions whether the principle of non-interference has been so significantly curtailed as to have lost its relevance in the contemporary legal order of the oceans. The book begins with an historical and theoretical examination of the framework underlying interception. This historical survey informs the remainder of the work, which then looks at the legal framework of the right of visit, contemporary challenges to the traditional right, interference on the high seas for the maintenance of international peace and security, interferences to maintain the 'bon usage' of the oceans (navigation and fishing), piracy j'ure gentium and current counter-piracy operations off the coast of Somalia, the problems posed by illegal, unregulated and unreported fishing, interdiction operations to counter drug and people trafficking, and recent interception operations in the Mediterranean Sea organised by FRONTEX.

**Encyclopedia of Public International Law** Max-Planck-Institut für Ausländisches Öffentliches Recht und Völkerrecht 1992 Award. **The Human Rights of Companies** Marius Emberland 2006 "This book studies the response of the European Court of Human Right, the international court that supervises governmental compliance with the European Convention on Human Rights (ECHR), to complaints submitted to it by companies and their shareholders." "This book is the first major study of the protection of business enterprise under the ECHR and thus an invaluable guide to understanding how the Court in Strasbourg responds to corporate complaints. More importantly, by focussing on a field of European human rights protection, where the protection of economic activity and corporate life is regarded as inseparable from core values of the ECHR such as an effective political democracy and the rule of law."--Jacket.

**Sources of State Practice in International Law** Ralph Gaebler 2002 Sources of State Practice in International Law is the true heir to Myers' 1922 classic Manual of Collections of Treaties. It is the only work that carries the thoroughness and scholarship of Myers into the United Nations era and on to today's new world order. The work is organized by country, with a lengthy additional chapter covering multi-jurisdictional sources. Each chapter describes relevant web sites as well as traditional bibliographic materials. The first release includes fully up-to-date documentation of state practice in international law in the following fourteen countries; Austria, Belgium, Canada, Denmark, Finland, France, Germany, Norway, Russia, Sweden, Switzerland, U.K., United States... as well as an annotated list of multi-jurisdictional collections arranged by subject. The authors provide references not only to treaty collections but also to sources of diplomatic documentation and other materials that shed light on customary state practice in international law. References to Yearbooks and Digests are also included. Every listing offers essential details of publication and/or online accessibility, as well as a brief note elucidating important considerations in the item's practical application. These descriptions, even for items catalogued in Myers or the UN List, are in most cases the most detailed bibliographic descriptions available in any legal source. Each chapter, compiled by an expert in the particular country's practice in international law, opens with a detailed introduction that locates the regime in question in the past and present context of international relations and international law, discusses issues of treaty succession, and describes the process of treaty ratification and implementation.
