Caste, Colonialism and Counter-modernity Debjani Ganguly 2005 One prevalent socio-cultural structure that is peculiar to South Asia is caste, which is broadly understood in socio-anthropological terms as an institution of ranked, hereditary and occupational groups. This book discusses the enigmatic persistence of caste in the lives of South Asians as they step into the twenty-first century. It investigates the limits of sociological and secular historical analysis of the caste system in South Asia and argues for ways of describing life-forms generated by caste on the subcontinent that supplement the accounts of caste in the social sciences. By focusing on the literary, oral, visual and spiritual practices of one particular group of ex-untouchables in western India called 'Mahars', the author suggests that one can understand caste not as an essence that is responsible for South Asia's backwardness, but as a constellation of variegated practices that are in a constant state of flux and cannot be completely encapsulated within a narrative of nation-building, modernization and development.

Two Faces of Protest Amrita Basu 1992-01-01 Drawing on case studies of the Communist Party of India in West Bengal and Shramik Sangathana in Maharashtra, this work examines Indian women's political activism. Investigating institutional changes at the state level and protest at the village level, Amrita Basu traces the paths of two kinds of political activism among these women. With insights gleaned from extensive interviews with activists, government officials, and ordinary men and women, she finds that militancy has been fueled by pronounced sexual class cleavages combined with potentially rancorous ethnic division.

The author has answered the above vexing questions based on an intensive study of Archaeology, Epigraphy, Numismatics, original records in different languages and the travelogues of foreign visitors.(Translator's Note).

Environmental Law and Policy in India Shyam Divan 2022-08-04 Environmental law and policy in India affects all sections of society. Those most deeply affected by it are the poor. They are the first victims of poor sanitation, polluted air, and contaminated water. Since the 1970s, efforts to protect environmental quality have met with limited success, posing enduring challenges for policy designers and decision-makers entrusted with protecting and preserving natural resources. This edition of Environmental Law and Policy retains the familiar analytical structure of the second edition and includes all major developments since then. It focuses on Indian environmental law, policies, problems, and needs with the comprehensiveness of an American law case book, compiles all the leading cases in environmental law in India with concise extracts of landmark judgments and policy documents, and provides discussions on projects which could potentially degrade the environment. This volume also covers air and water pollution, forests, wildlife, noise pollution, common property resources and tribal communities, environmental impact assessment, coastal regulations, large projects, urban problems, the National Green Tribunal, hazardous substances, transnational environmental policies, and international environment law. It is interlaced with notes, comments, and questions intended to encourage critical thinking amongst lawyers and law students.
