But finding the right collaborative partner and securing a place at its development table can be challenging. Drawing on her extensive experience as a grant developer and library director, Maxwell Presents an overview of grant basics, with extensive lists of both online and print resources Suggests how to frame libraries' research capabilities as benefits to the community at large, transforming these capabilities into a revenue source Explores strategies for locating potential partners, with tips on approaching collaborators and establishing successful relationships Describes what libraries can ask for from the grant developer, making sure to include what they want in the grant proposal!"

Best Practices in Grant Seeking: Beyond the Proposal Saadia Faruqi 2011-01-28 As the competition for private foundation dollars becomes increasingly more intense, nonprofit organizations are struggling to find competent grant writers who can show results. But even a perfectly written proposal, or a highly qualified grant writer, cannot guarantee funding. *Best Practices in Grant Seeking: Beyond the Proposal* explores how to involve an organization's leadership in the grant seeking process, and how to work together with staff from public relations, program,s and even other fundraising areas, to make the grant proposal process more fruitful. The best practices in this book can help nonprofit officials determine agency-wide activities – both short and long term – that support and enhance the efforts of the grant writer and that will ultimately improve the amount and number of grants receive from foundations by building long-lasting relationships with funders, accessing the power of their communities, and establishing internal communication and cooperation.

Finding Funding Ernest W. Brewer 2001-01-24 The materials collected, developed, and compiled in this volume are mostly related to grant-proposal development for education, but the push for uniformity in grants among the various federal agencies means that the materials have wider application. Some of the ideas and tips may be of general interest and value to a grantwriter; some ideas about "project management" should benefit anyone operating a project. The book is divided into three major parts and several additional supporting sections: Part I discusses the planning and some of the major "tools of the trade" needed to get started in the grant/project field and to use the Internet to access funding resources. Part II covers some important steps in developing a successful grant application. Part III discusses both closing out a project annually and the often difficult but realistic element of terminating the project at the end of external support. This handbook includes problem definition, analysis of need, goals and objectives, activities, some management details (timelines, personnel, budget, reports) evaluation, and dissemination of results. The work is about exploring, writing, implementing, and terminating an idea as a strong proposal and as an operating project. Appendices include list abbreviations, state points of contact, and a glossary. (Contains 51 references.) (DFR) *Winning Library Grants* Herbert B. Landau 2011 Here's a practical and comprehensive manual that guides you through grant fundamentals.
