**Saving Women's Lives**

National Research Council  
2005-04-18 The outlook for women with breast cancer has improved in recent years. Due to the combination of improved treatments and the benefits of mammography screening, breast cancer mortality has decreased steadily since 1989. Yet breast cancer remains a major problem, second only to lung cancer as a leading cause of death from cancer for women. To date, no means to prevent breast cancer has been discovered and experience has shown that treatments are most effective when a cancer is detected early, before it has spread to other

tissues. These two facts suggest that the most effective way to continue reducing the death toll from breast cancer is improved early detection and diagnosis. Building on the 2001 report *Mammography and Beyond*, this new book not only examines ways to improve implementation and use of new and current breast cancer detection technologies but also evaluates the need to develop tools that identify women who would benefit most from early detection screening. *Saving Women's Lives: Strategies for Improving Breast Cancer Detection and Diagnosis* encourages more research that integrates the development, validation, and analysis of the types of technologies in clinical practice that promote improved risk identification techniques. In this way, methods and technologies that improve detection and diagnosis can be more effectively

developed and implemented.

**Achievers** 2003

Privatization Experiences in the European Union Marko Köthenbürger 2006 Experts evaluate the varied outcomes of privatization experiences in Austria, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain, and the UK. The trend toward privatization, which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States, has attracted the attention of policymakers over the past two decades. Privatization is broadly supported by most academic economists, but the results of actual privatization efforts seem mixed. In the UK, for example, telecom rates fell sharply after privatization,

but privatized rail service was widely perceived to have declined dramatically in quality. In this CESifo volume, international experts examine the experiences of 10 EU countries, evaluating the real outcomes of privatization policies in Austria, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain, and the UK. The effects of privatization-- which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation-- are difficult to distinguish from the effects of other economywide influences. The studies in this volume meet this methodological challenge by using a well-defined set of criteria, including reducing consumer prices, increasing quantity, and improving quality, by which to make their assessments. Background chapters provide a conceptual

framework for considering the issues. Contributors Pablo Arocena, Sean D. Barrett, Ansgar Belke, Michel Berne, Henrik Christoffersen, Andrea Goldstein, Günter Knieps, David Newbery, Martin Paldam, David Parker, Gérard Pogorel, Friedrich Schneider, Eric van Damme, Ingo Vogelsang, Johan Willner

**Tourism in the New Europe** Rhodri Thomas  
2007-01-18 The book represents a state of the art review of key research on small firms in tourism in relation to European integration. It is, therefore, an essential resource for those engaged in research relating to tourism SMEs in transitional economies throughout the world. In addition, it is an essential purchase for the increasing number of students studying modules on small businesses as part of their final year undergraduate and postgraduate degree programmes. One of the key

features of this book is its clear focus on breaking new ground by reporting recent research and theorising on small firms in tourism. In many cases, the analysis provided by contributors will carefully relate small business behaviour to issues of wider concern to tourism academics and policy-makers. It is also distinctive for its overt emphasis on contrasting European experiences. These characteristics contrast with the existing literature on small firms in tourism and hospitality, particularly in Europe. Previous literature achieved their aims by providing valuable syntheses of existing literature. Now that such 'taking of stock' has been undertaken, there is a demand for more overtly research-based texts that are nevertheless accessible to a wide audience. This book does exactly that. Mergent's Handbook of NASDAQ Stocks Winter 2008 NAS 2008-01-28 This

handbook of NASDAQ stocks combines Mergent's informative analysis with stock price scores, performance ratios, and statistics. Individual investors, stockbrokers, analysts, and portfolio managers will find the in-depth insight and practical advice useful.
