**Financial Management: Principles and Applications** | William Petty 2015-05-20 The sixth edition of Financial Management provides students with an

overview of financial management suited to the first course in finance. The focus of the text is on the big picture, providing an introduction to financial decision making grounded in current financial theory and the current state of world economic conditions. Attention is paid to both valuation and capital markets, as well as their influence on corporate financial decisions. The 10 basic principles of finance are introduced in the first chapter and woven throughout the text, to give students a solid foundation from which to build their knowledge of finance. The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete understanding of the subject. This will give them the ability to apply what they have learnt to new and as yet unforeseen problems—in short, to educate students in finance.

**The Balkans: Foreign Direct Investment and EU Accession** Aristidis Bitzenis 2013-07-28 The fall of communism and subsequent developments have put a renewed spotlight on the potential of the Balkan economies. Bulgaria, Albania, Serbia & Montenegro, Romania and the Former Yugoslav Republic of Macedonia are countries which have attracted low levels of investment and poor political leadership in most of the countries has delayed much needed reforms. However, there are now signs of improvement and this timely book fills a significant gap in the available literature. Demonstrating that these countries must engage as fully as possible with the world economy via EU accession, this book explores the implications of the specific characteristics of these countries which have made the transition process more difficult. This exciting new volume is valuable reading for students, academics and business professionals interested in international development in the Balkans.
