The Possession Ryuho Okawa 2022-06-04 Are you or your family members suffering from inexplicable illnesses, successive injuries or accidents, evil habits or strange behavior, or mental disorder? If so, you or your family are likely to be possessed by evil spirits, wandering spirits, or devils. Possession is neither an exceptional occurrence nor unscientific superstition; it’s a phenomenon, based on spiritual principles, that is still quite common in the modern society. In The Possession, Okawa speaks of the way to tell if you are under possession, and its cause and prescription, from his several decades of experience as a spiritual master. Okawa is the Master of Happy Science, a religion founded in 1986 and now joined by people in more than 100 countries across the world. As of December 2019, he has given over 3,000 lectures and has published a total of more than 2,600 books worldwide, many which are translated into 31 languages. He has also given lectures in a dozen countries. Among these books, 500 of them are the Spiritual Interview series recorded through Okawa’s unparalleled spiritual ability. He is an expert in the laws that govern the spiritual world, as well as in the relationship between this world and the spiritual world, and has published many books on them. Through this book, you can find the way to change your own mind and free yourself from possession, and the way to exorcise devils by relying on the power of angels and God. If you are suffering because your psychiatrist or church cannot help you, why don’t you read, believe, and practice what is written in this book? Give it a try. This is a gospel that will help you rebuild your life.

The Metaphysics of Powers Anna Marmodoro 2010-06-10 This volume is a collection of papers that advance our understanding of the metaphysics of powers — properties such as fragility and electric charge. The metaphysics of powers is a fast developing research field with fundamental questions at the forefront of current research, such as Can there be a world of only powers? What is the manifestation of a power? Are powers and their manifestations related by necessity? What are the prospects for dispositional accounts of causation? The papers focus on questions concerning the metaphysics of powers that cut across any particular subject-specific ontological domain -- whether philosophy of science, philosophy of mind, ethics, epistemology - investigating the metaphysical structure of powers, the nature of the manifestation of powers, the necessity or contingency of a power’s relation to its manifestations, and powers and causation. A number of authors also engage in discussion with Humean and neo-Humean treatments of causation, thereby making contributions to a larger metaphysical debate beyond powers. Additionally, the authors engage critically with the latest contributions to the debate on powers in the literature, thereby bringing together in a wholesome and analytical way the most recent and noteworthy theoretical developments in this research field.

The Prized Possession Jill Schaible 2013-03 The only thing greater than fear is hope ... "Frustrations with jobs and employers, mortgages and car repairs, college debt and marital conflict make us so overwhelmed we can't even sleep. And thanks to wonderful drug advertising, very few of us are not on some sort of toxic substance to either help rest our minds at night or cope with stress during the day. Ask yourself if this is not true. People are taking their own life over this stuff, which makes me wonder if we've missed out on some secret. When wounded souls feel they have no other option but to remove themselves from this earth before their time, we'd better start uncovering some hope, and soon." Let's be honest. Our world is broken. We patch it up with all sorts of things, but underneath, where we really live, there is everything from anger, regret, lust, despair, and pain to fear, guilt, depression, greed, and unforgiveness. We are bombarded with distraction, deception, and way too much self-absorption to even recognize truth anymore. Is there any way out of this mess? Yes! There is indeed. It is found in one person, who gave everything to rescue us. His name is Jesus. The Prized Possession will help you discover who Jesus really is and why He is the only hope for hurting hearts. You will see why self-absorption and self-reliance are highly overrated, and how they keep us far from the freedom we need to see beyond our circumstances. Within these pages are true, personal stories sure to inspire your heart and stretch your understanding of God and His unrivaled love for humanity. If you have questions about life, come along on an exciting journey toward hope, purpose, and redemption. There is a very generous God just waiting for you.

Fusion of the Worlds Paul Stoller 1989-07-10 “This ethnography is more like a film than a book, so well does Stoller evoke the color, sight, sounds, and movements of Songhay possession ceremonies.”—Choice “Stoller brilliantly recreates the reality of spirit presence; hosts are what they mediate, and spirits become flesh and blood in the ‘fusion’ with human existence. . . . An excellent demonstration of the benefits of a new genre of ethnographic writing. It expands our understanding of the harsh world of Songhay mediums and sorcerers.”—Bruce Kapferer, American Ethnologist “A vivid story that will appeal to a wide audience. . . . The voices of individual Songhay are evident and forceful throughout the story. . . . Like a painter, [Stoller] is concerned with the rich surface of things, with depicting images, evoking sensations, and enriching perceptions. . . . He has succeeded admirably.” —Michael Lambek, American Anthropologist “Events (ceremonies and life histories) are evoked in cinematic style. . . . [This book is] approachable and absorbing—it is well written, uncluttered by jargon and elegantly structured.”—Richard Fardon, Times Higher Education Supplement “Compelling, insightful, rich in ethnographic detail, and worthy of becoming a classic in the scholarship on Africa.”—Aidan Southall, African Studies Review

Demonic Possession in the New Testament William M. Alexander 2001-08-21 Demon possession in New Testament times was real, contends the author in the face of rationalistic denials. A study of the Gospels reveals that genuine demon possession had two distinctive elements: (1) insanity or idiocy of some sort, forming the natural element,Ó and (2) the confession of Jesus as Messiah, forming the supernatural element.Ó The author’s research also led him to conclude that demon possession in the New Testament is a unique phenomenon in the history of the world, being confined indeed to the earlier portion of the ministry of our Lord.Ó Why did this phenomenon erupt when it did? The incarnation initiated the establishment of the kingdom of heaven upon earth. That determined a countermovement among the powers of darkness. Genuine demonic possession was one of its manifestations.Ó Entire chapters are devoted to historic demonology, medical aspects of demonic possession, the existence of genuine demonic possession, the New Testament narratives concerning the Beelzebul controversyÓ and the Gerasene affair,Ó and the alleged continuance of genuine demonic possession.

Emmanuel Levinas Abi Doukhan 2012-08-23 Our era is profoundly marked by the phenomenon of exile and it is has become increasingly urgent to rethink the concept of exile and our stance towards it. This renewed reflection on the problem of exile brings to the fore a number of questions regarding the traditionally negative connotation of exile. Is there not another way to understand the condition of exile? Permeated with references to the 'stranger', the 'other' and 'exteriority', the philosophy of Emmanuel Levinas signifies a positive understanding of exile. This original and compelling book distills from Levinas’s philosophy a wisdom of exile, for the first time shedding a positive light on the condition of exile itself. Abi Doukhan argues that Levinas’s philosophy can be understood as a comprehensive philosophy of exile, from his ethics to his thoughts on society, love, knowledge, spirituality and art, thereby presenting a comprehensive view of the philosophy of Levinas himself as well as a renewed understanding of the wealth and contribution of exile to a given society.

Phenomenology and Aesthetics M. Kronegger 2012-12-06 and the one in the middle which judges as he enjoys and enjoys as he judges. This latter kind really reproduces the work of art anew. The division of our Symposium into three sections is justified by the fact that phenomenology, from Husserl, Heidegger, Moritz Geiger, Ingarden, in Germany and Poland, Merleau-Ponty, Paul Ricoeur, E. Levinas in France, Unamuno in Spain, and Tymieniecka, in the United States, have revealed striking coincidences in trying to answer the following questions: What is the philosophical vocation of literature? Does literature have any significance for our lives? Why does the lyric moment, present in all creative endeavors, in myth, dance, plastic art, ritual, poetry, lift the human life to a higher and authentically human level of the existential experience of man? Our investigations answer our fundamental inquiry: What makes a literary work a work of art? What makes a literary work a literary work, if not aesthetic enjoyment? As much as the formation of an aesthetic language culminates in artistic creation, the

formation of a philosophical language lives within the orbit of creative imagination.

Sensational Religion Sally M. Promey 2014-06-24 The result of a collaborative, multiyear project, this groundbreaking book explores the interpretive worlds that inform religious practice and derive from sensory phenomena.

Under the rubric of "making sense," the studies assembled here ask, How have people used and valued sensory data? How have they shaped their material and immaterial worlds to encourage or discourage certain kinds or patterns of sensory experience? How have they framed the sensual capacities of images and objects to license a range of behaviors, including iconoclasm, censorship, and accusations of blasphemy or sacrilege? Exposing the dematerialization of religion embedded in secularization theory, editor Sally Promey proposes a fundamental reorientation in understanding the personal, social, political, and cultural work accomplished in religion’s sensory and material practice. Sensational Religion refocuses scholarly attention on the robust material entanglements often discounted by modernity’s metaphysic and on their inextricable connections to human bodies, behaviors, affects, and beliefs.

Possessing the World Bouda Etamad 2007-07-15 Based on an impressive body of information and data, this volume recounts the history of five continents over a long stretch of time and in a comparative approach. From the beginning of European expansion the question was posed: what were the "empire tools" that gave Europe its military superiority, even before the industrial revolution? What was it that enabled Europeans to withstand life-threatening tropical diseases and to control indigenous populations? This book gives a fresh and wide-ranging view of the construction and collapse of the modern colonial empires of Europe, the United States of America and Japan.

Art and Knowledge James O. Young 2003-09-02 Almost all of us would agree that the experience of art is deeply rewarding. Why this is the case remains a puzzle; nor does it explain why many of us find works of art much more important than other sources of pleasure. Art and Knowledge argues that the experience of art is so rewarding because it can be an important source of knowledge about ourselves and our relation to each other and to the world. The view that art is a source of knowledge can be traced as far back as Aristotle and Horace. Artists as various as Tasso, Sidney, Henry James and Mendelssohn have believed that art contributes to knowledge. As attractive as this view may be, it has never been satisfactorily defended, either by artists or philosophers. Art and Knowledge reflects on the essence of art and argues that it ought to provide insight as well as pleasure. It argues that all the arts, including music, are importantly representational. This kind of representation is fundamentally different from that found in the sciences, but it can provide insights as important and profound as available from the sciences. Once we recognise that works of art can contribute to knowledge we can avoid thorough relativism about aesthetic value and we can be in a position to evaluate the avant-garde art of the past 100 years. Art and Knowledge is an exceptionally clear and interesting, as well as controversial, exploration of what art is and why it is valuable. It will be of interest to all philosophers of art, artists and art critics.

Possessed by Ghosts Wanda Pratkanica 2006-01 The book is aimed at all readers not just those who are interested in the esoteric. It introduces accessibly and surprisingly clearly the causes of the toxic relationships that arise between people and ghosts. It contains a large dose of psychology of the soul, testimony to the author’s spiritual maturity. Ghosts are the souls of people who, after the death of their physical body, have not resolved to pass through to the other side of death’s curtain. The reason for that is that, for various reasons, they overlooked their own deaths, didn’t have the courage to go through to the other side or were detained or even pulled away from their road by those mourning the souls of their near ones. When they remain in the world of the living they possess people which can be the cause of very unpleasant and sometimes even tragic experiences. Starting with the mildest – the presence of ghosts in a person causes severe mood swings ranging from powerful explosions of negative energy to deep depressions. They bring out severe states of anxiety, they tempt those possessed to commit suicide, they have a powerful influence on the psyche and are the cause of psychiatric illnesses. In addition, the diseases of the dead person very often transfer through the ghost to the person possessed. Wanda Pratkanica is an exorcist and psychotherapist of world renown. Over the past thirty years she has helped many thousands of patients throughout the world.

Divine Science and the Science of God Victor Preller 2005-05-17 In this book, Victor Preller examines the logical status of religious language in the light of recent developments in American analytic philosophy. The problem inherent in religious language is presented in terms of the referential status of the word God. The author argues that the significance of any referential term is dependent upon the ability of that term to play a significant role ‘within’ a unified conceptual system. The problem is shown to transcend the epistemological dogmas of Positivism and Conceptual Empiricism and to be inherent in any intelligible epistemology, including that of Thomas Aquinas, whose theological treatises serve as a model of religious language for the thesis of this book. According to Professor Preller, Divine Science (Aquinas’ term for what we now call Natural Theology) results from a reflection upon the limitations encountered by the intellect in its attempt to render intelligible the objects of human experience. In the Science of God (Aquinas’ term for that mode of knowing engendered by faith), the unknown meta-empirical referent of Divine Science becomes the object of the human intellect. While this study develops out of the discussions inaugurated by Flew and McIntyre in ‘New Essays in Philosophical Theology’, it rejects the excessively empirical approach of most other studies in that tradition. It applies post-positivistic analysis to specifically Catholic theological language, but it obviously applies to the theological language involved in any form of theism.

Culture in Minds and Societies Jaan Valsiner 2007-07-03 In short, Culture in Minds and Societies: Foundations of Cultural Psychology presents a new look at the relationship between people and society, produces a semiotic theory of cultural psychology and provides a dynamic treatment of culture in human lives. This book makes a decisive break from the post-modernist theoretical framework that considers knowledge as local and situation-specific. It restores the goal of construction of general knowledge to the social sciences. While recognizing the uniqueness of all human personal experience from birth to death, it emphasizes the universality of cultural organization of human minds and societies.
