*Beyond Rationalism* Bruce Kapferer 2003-02-01 This book seeks a reconsideration of the phenomenon of sorcery and related categories. The contributors to the volume explore the different perspectives on human sociality and social and political constitution that practices typically understood as sorcery, magic and ritual reveal. In doing so the authors are concerned to break away from the dictates of a western externalist rationalist understanding of these phenomena without falling into the trap of mysticism. The articles address a diversity of ethnographic contexts in Africa, Asia, the Pacific and the Americas.

*Sociale & culturele antropologie* John Monaghan 2015-03-25 'Als je wilt weten wat antropologie is, moet je kijken naar wat antropologen doen,' zo schrijven de auteurs van dit Elementaire Deeltje. In deze boeiende introductie op dit vakgebied komen dus, naast de belangrijkste principes en methodes, veel voorbeelden aan bod van de antropoloog aan het werk. Puttend uit hun eigen ervaringen in Indonesië en Midden-Amerika bespreken de auteurs de wijze waarop sociale en culturele antropologie ons begrip over de menselijke samenleving en cultuur hebben helpen vormen.

*Theories of Witchcraft in Practice: F.G. Bailey's 'The Witch-Hunt'* Carolin Duss 2010-03-16 Seminar paper from the year 2007 in the subject Ethnology / Cultural Anthropology, grade: 1,3, University of Heidelberg (Institut für Ethnologie), course: Sorcery and Witchcraft in South Asia: Theories and Practices of the Occult, language: English, abstract: To most people growing up in a Western cultural setting, magic, sorcery and witchcraft hold a certain fascination. There always seems to be something mysterious, extraordinary, even risky to the named issues, probably because we just don't face them in everyday life. Anthropology shares this fascination for the following reasons: "cross-cultural prevalence, frequent cultural prominence, paradoxical attributes, no doubt the attraction of the exotic, and the potential for testing theories about belief and social action" (Levine 1982: 259). In this paper, I will focus mainly on the subject of witchcraft without disregarding important links to magic and sorcery. Central questions are: What is witchcraft? Under what circumstances does witchcraft appear? Why do people accuse others of it or confess to witchcraft themselves? How does witchcraft relate to the social structure, economics, politics and personal affairs of the members of a society? There have been different answers to those questions since the first papers on magic, sorcery, and witchcraft have been written in the late 19th and early 20th century. In chapter 2, I will therefore present a historical overview of the most important approaches in general which are also especially important for this study. Theories by Frazer, Tylor, Malinowski, Evans-Pritchard and Douglas will be sketched out. Beforehand I will try to discern the concepts of magic, witchcraft and sorcery in chapter 1 and name their most important aspects. This differentiation is important to do, since the meanings of the named terms have changed over the decades and there is still a bit of disaccord or confusion in the use and understanding of them today. In chapter 3, I will give a résumé of the monography 'The Witch-Hunt; or: a Triumph of Morality' by F.G. Bailey which is based on his fieldwork in an Indian village in 1953. He uses several anthropological approaches to explain and interpret the exceptional events that have taken place, drawing on functional, structural and psychological theories. Also in chapter 3, I will point out how Bailey provides empiric examples for theories stated by great anthropologists over the decades. Lastly, I will draw a conclusion and try to answer the questions I posed above.

*Making Magic* Randall Styers 2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines, the concept of "magic" has played a major role in defining religion and in mediating the relation of religion to science. Across these disciplines, magic has regularly been configured as a definitively non-modern phenomenon, juxtaposed to distinctly modern models of religion and science. Yet this notion of magic has remained stubbornly amorphous. In *Making Magic*, Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that. He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity, norms based on narrow forms of instrumental rationality, industrious labor, rigidly defined sexual roles, and the containment of wayward forms of desire. Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety, legitimate scientific rationality, and orderly social relations are brought into relief. Scholars have found magic an invaluable tool in their efforts to define the appropriate

boundaries of religion and science. On a broader level, says Styers, magical thinking has served as an important foil for modernity itself. Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world.

*Ritual and Belief* David Hicks 2010-03-15 Ritual and Belief: Readings in the Anthropology of Religion is a collection of 41 readings in religion, magic, and witchcraft. The choice of readings is eclectic: no single anthropological approach or theoretical perspective dominates the text. Theoretical significance, scholarly eminence of the author, and inherent interest provide the principal criteria, and each reading complements its companion chapters, which are pedagogically coherent rather than ad hoc assemblages. Included among the theoretical perspectives are structural-functionalism, structuralism, Malinowskian functionalism, cultural materialism, and cultural evolutionism; also included are the synchronic and diachronic approaches. The book offers a mixture of classic readings and more recent contributions, and the 'world religions' are included along with examples from the religions of traditionally non-literate cultures. As diverse a range of religious traditions as possible has been embraced, from various ethnic groups, traditions, and places.

**Religion and Culture** Annemarie de Waal Malefijt 1968 A comprehensive anthropological study of religion traces the history of the discipline, discusses the archeological discoveries that have shed light on the development of religious consciousness, and examines the various manifestations, functions, and changes of religious customs and beliefs.

**Luther** Lyndal Roper 2016-12-06 In 'Luther' vertelt hoogleraar geschiedenis Lyndal Roper het levensverhaal van de Duitse Maarten Luther. Als de dan nog onbekende Maarten Luther op 31 oktober 1517 in een Duits stadje een theologisch pamflet op de deuren van de kerk spijkt, kan hij niet voorzien dat die daad het begin zal vormen van de moderne tijd. Zijn poging om het christendom te hervormen verdeelt de westerse kerk tot op het bot en brengt het geloof van de mensen in heel Europa aan het wankelen. De Reformatie is een feit. Maarten Luther (1483-1546) verenigde vele kanten in zich. Hij was een zeer gelovig mens maar werd tegelijk verscheurd door spirituele twijfel. Luther was een fantastisch schrijver wiens vertaling van de Bijbel de Duitse taal definitief zou vormen. Hij was een getrouwde ex-monnik die de menselijke seksualiteit bevrijdde van het stigma van de zonde. Een religieuze fundamentalist, een jodenhater en een politiek reactionair. In deze nieuwe, gezaghebbende biografie laat Lyndal Roper zien hoe een ogenschijnlijk kleine daad van verzet leidde tot een strijd tegen de overheersende macht van de kerk. Roper beschrijft de tegenstrijdige psychologische krachten waardoor Luther werd gedreven en de enorme invloed die hij heeft gehad op het verloop van de Europese geschiedenis. Nieuwe, gezaghebbende biografie over de man die de Reformatie ontketende

*Magic, Witchcraft and the Otherworld* Susan Greenwood 2020-08-02 Anthropology's long and complex relationship to magic has been strongly influenced by western science and notions of rationality. This book takes a refreshing new look at modern magic as practised by contemporary Pagans in Britain. It focuses on what Pagans see as the essence of magic - a communication with an otherworldly reality. Examining issues of identity, gender and morality, the author argues that the otherworld forms a central defining characteristic of magical practice. Integrating an experiential ethnographic approach with an analysis of magic, this book asks penetrating questions about the nature of otherworldly knowledge and argues that our scientific frameworks need re-envisioning. It is unique in providing an insider's view of how magic is practised in contemporary western culture.

**Witchcraft, Oracles and Magic Among the Azande** Kitty Wheeler 2017-07-05 The history of anthropology is, to a large extent, the history of differing modes of interpretation. As anthropologists have long known, examining, analyzing and recording cultures in the quest to understand humankind as a whole is a vastly complex task, in which nothing can be achieved without careful and incisive interpretative work. Edward Evans-Pritchard's seminal 1937 *Witchcraft, Oracles, and Magic Among the Azande* is a model contribution to anthropology's grand interpretative project, and one whose success is based largely on its author's thinking skills. A major issue in anthropology at the time was the common assumption that the faiths and customs of other cultures appeared irrational or illogical when compared to the "civilized" and scientific beliefs of the western world. Evans-Pritchard sought to challenge such definitions by embedding himself within a tribal culture in Africa - that of the Azande - and attempting to understand their beliefs in their proper contexts. By doing so, Evans-Pritchard proved just how vital context is to interpretation. Seen within their context, he was able to show, the beliefs of the Azande were far from irrational - and magic actually formed a coherent system that helped mould a functional community and society for the tribe. Evans-Pritchard's efforts to clarify meaning in this way have proved hugely influential, and have played a major part in guiding later generations of anthropologists from his day to ours.

**Magic, Witchcraft, and Religion in the Media (Revised Second Edition)** Liam D. Murphy 2016-08-18 Western popular culture is saturated with ideas drawn from religious institutions and a variety of other forms of awareness. In an age that many view as secular, news accounts are replete with sensationalist stories about inexplicable supernatural events. The Occult, mythology, vampires, zombies, ghosts and apparitions, and paranormal activity are but a few of the supernatural or cosmological themes and images that are felt in everyday life. *Magic, Witchcraft, and Religion in the Media*, represents a unique effort to capture a cross-section of these events in media reportage and analyze them through the lens of anthropology.

The essays selected for this text, which are drawn from a variety of news media and online sources, are clustered around important themes and discussed in terms of their impact on society. They illustrate how classic observations and theory made by social and cultural anthropologists have real world application in everyday American life. This is an ideal supplemental text for introductory and general education courses on "the anthropology of religion," yet it is accessible to an educated public. Liam D. Murphy is a professor of anthropology at California State University, Sacramento. He is the author of many articles and research papers on religion, politics, and identity, published in such peer-reviewed journals as the *Journal of Ritual Studies*, the *Journal of the Society for the Anthropology of Europe*, *Anthropology in Action*, and the *Anthropological Journal of European Cultures*. He is also co-author (with Paul A. Erickson) of *A History of Anthropological Theory* (UTP Higher Education, 2013) and co-editor (with Paul A. Erickson) of *Readings for a History of Anthropological Theory* (UTP Higher Education, 2013). A specialist on religion in Northern Ireland, Murphy is also the author of *Believing in Belfast: Charismatic Christianity after the Troubles* (Carolina Academic Press, 2010). His current ethnographic research focuses on heavy metal and cultural identity in Western France.

*The Anthropology of Religion in a Globalizing World* Ida Fadzillah Leggett 2016-12-02 *Anthropology of Religion in a Globalizing World* focuses on religions and belief systems in a global, multi-cultural, popular, and constantly transforming world. Today's cultural groups exist across national borders and ethnic boundaries, and their religious ideologies rapidly adapt and follow suit. This book uses the lenses of gender, race, class, health and illness, the environment, and cyber space to present the concepts and interpretations of world religions and belief systems as modern, fluid, complex, and constantly changing, rather than static or outdated. **War Magic** Douglas Farrer 2016-09-01 This compelling volume explores how war magic and warrior religion unleash the power

of the gods, demons, ghosts, and the dead. Documenting war magic and warrior religion as they are performed in diverse cultures and across historical time periods, this volume foregrounds embodiment, practice, and performance in anthropological approaches to magic, sorcery, shamanism, and religion. The authors go beyond what magic 'represents' to consider what magic does. From Chinese exorcists, Javanese spirit siblings, and black magic in Sumatra to Tamil Tiger suicide bombers, Chamorro spiritual re-enchantment, tantric Buddhist war magic, and Yanomami dark shamans, religion and magic are re-evaluated not just from the practitioner's perspective but through the victim's lived experience. These original investigations reveal a nuanced approach to understanding social action, innovation, and the revitalization of tradition in colonial and post-colonial societies undergoing rapid social transformation.

**Magic, Witchcraft, and Religion** Pamela A. Moro 2008 This comparative reader takes an anthropological approach to the study of religious beliefs, both strange and familiar. The engaging articles on all key issues related to the anthropology of religion grab the attention of students, while giving them an excellent foundation in contemporary ideas and approaches in the field. The multiple authors included in each chapter represent a range of interests, geographic foci, and ways of looking at each subject. Divided into ten chapters, this book begins with a broad view of anthropological ways of looking at religion, and moves on to some of the core topics within the subject, such as myth, ritual, and the various types of religious specialists.

**Anthropology and Religion** Robert L. Winzeler 2012 Drawing

from ethnographic examples found throughout the world, this revised and updated text, hailed as the "best general text on religion in anthropology available," offers an introduction to what anthropologists know or think about religion, how they have studied it, and how they interpret or explain it since the late 19th century.

**The Anthropology of Magic** Susan Greenwood 2020-05-28 Magic is arguably the least understood subject in anthropology today. Exotic and fascinating, it offers us a glimpse into another world but it also threatens to undermine the foundations of anthropology due to its supposed irrational and non-scientific nature. Magic has thus often been 'explained away' by social or psychological reduction. The Anthropology of Magic redresses the balance and brings magic, as an aspect of consciousness, into focus through the use of classic texts and cutting-edge research. Suitable for student and scholar alike, The Anthropology of Magic updates a classical anthropological debate concerning the nature of human experience. A key theme is that human beings everywhere have the potential for magical consciousness. Taking a new approach to some perennial topics in anthropology - such as shamanism, mythology, witchcraft and healing - the book raises crucial theoretical and methodological issues to provide the reader with an engaging and critical understanding of the dynamics of magic.
