*Group Work Research* Charles D. Garvin 2015-12-18 Group Work Research is an essential resource for anyone seeking to conduct research on groups or develop empirically based group work practices. It illustrates how to plan and conduct group work research, including studies of the impact of groups on individual members, group conditions (e.g. cohesiveness, roles, processes, structures), and other systems external to the group. Furthermore, it will walk the reader through the process of conducting group work research, from formulating the research problem to selecting a design, measuring variables, and disseminating the findings. The authors also discuss considerations when the purpose of the research is an evaluation of a group work program. The amount of research that has been published about group work is not reflective of the technique's extensive use. Laying out all the fundamental details of group work research in a straightforward, reader-friendly manner, Group Work Research will be invaluable to doctoral students and faculty in group work, as well as professionals without formal training in using research to inform their practice.Comprehensive guide that takes the reader through the phases of conceptualizing, designing, implementing, and disseminating group work researchLinks group work processes to issues of social justiceIncludes a chapter that describes how social justice issues should be considered at each phase

**The Columbia Guide to Social Work Writing** Warren Green 2012-07-17 Social work practitioners write for a variety of publications, and they are expected to show fluency in a number of related fields. Whether the target is a course instructor, scholarly journal, fellowship organization, or general news outlet, social workers must be clear, persuasive, and comprehensive in their writing, especially on provocative subjects. This first-of-its-kind guide features top scholars and educators providing a much-needed introduction to social work writing and scholarship. Foregrounding the process of social work writing, the coeditors particularly emphasize how to think about and approach one's subject in a productive manner. The guide begins with an overview of social work writing from the 1880s to the present, and then follows with ideal strategies for academic paper writing, social work journal writing, and social work research writing. A section on applied professional writing addresses student composition in field education, writing for and about clinical practice, the effective communication of policy information to diverse audiences, program and proposal development, advocacy, and administrative writing. The concluding section focuses on specific fields of practice, including writing on child and family welfare, contemporary social issues, aging, and intervention in global contexts. Grounding their essays in systematic observations, induction and deduction, and a wealth of real-world examples, the contributors describe the conceptualization, development, and presentation of social work writing in ways that better secure its power and relevance.
