Global Governance Thomas G. Weiss 2013-07-11 Friends and foes of international cooperation puzzle about how to explain order, stability, and predictability in a world without a central authority. How is the world governed in the absence of a world government? This probing yet accessible book examines

"global governance" or the sum of the informal and formal values, norms, procedures, and institutions that help states, intergovernmental organizations, civil society, and transnational corporations identify, understand, and address trans-boundary problems. The chasm between the magnitude of a growing number of global threats - climate change, proliferation of weapons of mass destruction, terrorism, financial instabilities, pandemics, to name a few - and the feeble contemporary political structures for international problem-solving provide compelling reasons to read this book. Fitful, tactical, and short-term local responses exist for a growing number of threats and challenges that require sustained, strategic, and longer-run global perspectives and action. Can the framework of global governance help us to better understand the reasons behind this fundamental disconnect as well as possible ways to attenuate its worst aspects? Thomas G. Weiss replies with a guardedly sanguine "yes".

Nonconventional Limit Theorems And Random Dynamics Kifer Yuri 2018-04-05

The book is devoted to limit theorems for nonconventional sums and arrays. Asymptotic behavior of such sums were first studied in ergodic theory but recently it turned out that main limit theorems of probability theory, such as central, local and Poisson limit theorems can also be obtained for such expressions. In order to obtain sufficiently general local limit theorem, we develop also thermodynamic formalism type results for random complex operators, which is one of the novelties of the book. Contents: Nonconventional Limit Theorems: Stein's Method for Nonconventional Sums Local Limit Theorem Nonconventional Arrays Random Transformations Thermodynamic Formalism for Random Complex Operators: Ruelle–Perron–Frobenius Theorem via Cone Contractions Application to Random Locally Expanding Covering Maps Pressure, Asymptotic Variance and Complex Gibbs Measures Application to Random Complex Integral Operators Fiberwise Limit Theorems Readership: Advanced graduate students and researchers in probability theory and stochastic processes and dynamical systems and ergodic theory. Keywords: Limit Theorems; Nonconventional Sums; Nonconventional Arrays; Stochastic Processes; Dynamical Systems; Stein's Method; Martingale Approximation; Thermodynamic Formalism; Strong Law of Large Numbers; Central; Local and Poisson Limit Theorems Review: Key Features: The results in the book are new and

never appeared before, Prof. Yuri Kifer is a well-known researcher in probability and dynamical systems, he published several books and more than 130 papers and he initiated the research on nonconventional limit theorems in the last decade

Britain and the United States in Greece Spero Simeon Z. Paravantes 2020-10-15 For the first time, Britain and the United States in Greece provides an in-depth analysis of Anglo-American diplomacy in Greece from 1946 to 1950. After World War II, as Europe floundered economically, British Prime Minister Clement Attlee looked to disengage Britain from some of its broad international obligations and increase American support for its new foreign agenda. One place he sought to do so was in Greece. Spero Simeon Z. Paravantes reveals how the relationship between Britain and the US developed in this formative period, arguing that Britain used the fast-escalating tensions of the Cold War to direct US policy in Greece and encourage the Americans to take a more active role – effectively taking Britain's place – in the region. In the process, Paravantes sheds new light on how the American experience in Greece contributed to the formulation of the Truman Doctrine and the containment of communism, the structure of Greek institutions, and ultimately, the birth of the Cold War. Drawing on a wide range of sources from Britain, the US, Greece and the Balkans, this book is essential reading for all scholars looking to gain fresh insight into the complex origins of the Cold War, 20th-century Anglo-American relations, and the history of modern Greece.

Priest, Politician, Collaborator

James Mace Ward 2013-04-15 In *Priest, Politician, Collaborator*, James Mace Ward offers the first comprehensive and scholarly English-language biography of the Catholic priest and Slovak nationalist Jozef Tiso (1887–1947). The first president of an independent Slovakia, established as a satellite of Nazi Germany, Tiso was ultimately hanged for treason and (in effect) crimes against humanity by a postwar reunified Czechoslovakia. Drawing on extensive archival research, Ward portrays Tiso as a devoutly religious man who came to privilege the maintenance of a Slovak state over all other concerns, helping thus to condemn Slovak Jewry to destruction. Ward, however, refuses to reduce Tiso to a mere opportunist, portraying him also as a man of principle and a victim of international circumstances. This potent mix, combined with an almost epic ability to deny the consequences of his own actions, ultimately led to Tiso's undoing. Tiso began his career as a fervent priest seeking to defend the church and pursue social justice within the Kingdom of Hungary. With the breakup of Austria-Hungary in 1918 and the creation of a Czechoslovak Republic, these missions then fused with a parochial Slovak nationalist agenda, a complex process that is the core narrative of the book. Ward presents the strongest case yet for Tiso's heavy responsibility in the Holocaust, crimes that he investigates as an outcome of the interplay between Tiso's lifelong pattern of collaboration and the murderous international politics of Hitler's Europe. To this day memories of Tiso divide opinion within Slovakia, burdening the country's efforts to come to terms with its own history. As portrayed in this masterful biography, Tiso's life not only

illuminates the history of a small state but also supplies a missing piece of the larger puzzle that was interwar and wartime Europe.

Return of the Barbarians Jakub J. Grygiel 2018-06-07 Barbarians are back. These small, highly mobile, and stateless groups are no longer confined to the pages of history; they are a contemporary reality in groups such as the Taliban, Al-Qaeda,

and ISIL. *Return of the Barbarians* re-examines the threat of violent non-state actors throughout history, revealing key lessons that are applicable today. From the Roman Empire and its barbarian challenge on the Danube and Rhine, Russia and the steppes to the nineteenth-century Comanches, Jakub J. Grygiel shows how these groups have presented peculiar, long-term problems that could rarely be solved with a finite war or clearly demarcated diplomacy. To succeed and survive, states were often forced to alter their own internal structure, giving greater power and responsibility to the communities most directly affected by the barbarian menace. Understanding the barbarian challenge, and strategies employed to confront it, offers new insights into the contemporary security threats facing the Western world.

Healthcare Research Ethics and Law

Hazel Biggs 2009-10-16 The book explores and explains the relationship between law and ethics in the context of medically related research in order to provide a practical guide to understanding for members of research ethics committees (RECs), professionals involved with medical research and those with an academic interest in the subject. *Healthcare Research Ethics and Law* sets out the law as it relates to the functions of Research Ethics Committees (RECs) within the context of the process of ethical review and aims to be accessible and readily understood by REC members. Each chapter begins by locating the material within the practical context of ethical review and then provides a more theoretical and analytical discussion detailing how the theory and practice fit together. The key legal issues of confidentiality, consent and negligence are addressed in detail, alongside practical guidance as to how and when liability may be incurred in these areas. In addition, the practical and legal implications of the implementation of European Directive 2001/20/EC, the Human Tissue Act 2004 and the Mental Capacity Act 2005 are considered alongside a discussion of their socio-political background and relevance for medical research in the UK.

Air War Over East Yorkshire in World War II Paul Bright 2005 In most accounts of the air war over Britain in summer 1940, the events over East Yorkshire are mentioned only in passing, yet it was there, on August 20th, that the first enemy aircraft fell to the guns of a Polish fighter squadron in the RAF, less than a mile from where these words are being written. It was also where the 'north-east town', as Hull was identified in the news bulletins of the day, suffered its prolonged agony under the bombs of the Luftwaffe. Indeed, the very last British civilians to die as a direct result of Luftwaffe bombs in World War II were killed in Hull on March 17th, 1945. As the home of much of the RAF's night-bombing force, East Yorkshire was also frequently the scene of Luftwaffe night intruder raids. This book, based on years of in-depth research into primary sources, personal accounts and experiences, reveals many new facts and gives long-overdue recognition to the events and people who fought, lived and all too often, died, in East Yorkshire during 1939-1945.
The World War Harry S. Canfield 1919

The theme of power relations is a very strong, unifying element--that is, relations of gender, social class, ethnicity, and age. Through such topics as

prostitution, prohibition, youth courts, and the regulation of sexuality, we can trace these relations of power and how they link to the definition of crime in society.

Vancouver & Beyond Fred Thirkell 2000 An anthology of 50 stories about Vancouver and environs in the early years of the 20th century. These stories grew out of a collection of picture postcards -- not just any old postcards, but particularly appealing 'real photo' cards that seemed to be waiting to have their stories told. While some of the images are not uncommon, most of the pictures are rare, if not one-of-a-kind survivors of the 'golden age' of postcards,

which encompassed the years between 1900 and 1914, the relatively short period of time when Vancouver ended its days as a frontier town and became a significant Canadian city. Am Anfang war die Logik George Heffernan 1988-12-31

Facing Global Environmental Change
Hans Günter Brauch 2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally. Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth - sessment Report (AR4) of the Intergovernmental Panel on Climate Change (IPCC), which were disseminated on a large scale and reported extensively by the media. This was the result not only of a heightened interest on the part of the public on various aspects of climate change, but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large. The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US, Al Gore. By taking this decision in favour of a leader who has done a great deal to create awareness on climate change, and a body that assesses all scientific aspects of climate change and disseminates the result of its findings, the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world.

Anxious Days and Tearful Nights
Martha Hanna 2020-10-22 What was it like to be a soldier's wife in Canada during the First World War? More than 80,000 Canadian women were married to men who left home to fight in the war, and its effects on their lives

were transformative and often traumatic. Yet the everyday struggles of Canadian war wives, lived far from the battlefields of France, have remained in the shadows of historical memory. *Anxious Days and Tearful Nights* highlights how Canadian women's experiences of wartime marital separation resembled and differed from those of their European counterparts. Drawing on the letters of married couples separated by wartime service and the military service records of hundreds of Canadian soldiers, Martha Hanna reveals how couples used correspondence to maintain the routine and the affection of domestic life. She explores how women managed households and budgets, how those with children coped with the challenges of what we today would call single parenthood, and when and why some war wives chose to relocate to Britain to be nearer to their husbands. More than anything else, the life of a war wife - especially a war wife separated from her husband for years on end - was marked and marred by unrelieved psychological stress. Through this close personal lens Hanna reveals a broader picture of how war's effects persist across time and space.

James and Esther Cooper Jackson Sara Rzeszutek 2015-11-06 James Jackson and Esther Cooper Jackson grew up understanding that opportunities came differently for blacks and whites, men and women, rich and poor. In turn, they devoted their lives to the fight for equality, serving as career activists throughout the black freedom movement. Having grown up in Virginia during the depths of the Great Depression, the Jacksons also saw a path to racial equality through the Communist Party. This choice in political affiliation would come to shape and define not only their participation in the black freedom

movement but also the course of their own marriage as the Cold War years unfolded. In this dual biography, Sara Rzeszutek examines the couple's political involvement as well as the evolution of their personal and public lives in the face of ever-shifting contexts. She documents the Jacksons' significant contributions to the early civil rights movement, discussing their time leading the Southern Negro Youth Congress, which laid the groundwork for youth activists in the 1960s; their numerous published writings in periodicals such as *Political Affairs*; and their editorial involvement in *The Worker* and the civil rights magazine *Freedomways*. Drawing upon a rich collection of correspondence, organizational literature, and interviews with the Jacksons themselves, Haviland follows the couple through the years as they bore witness to economic inequality, war, political oppression, and victory in the face of injustice. Her study reveals a portrait of a remarkable pair who lived during a transformative period of American history and whose story offers a vital narrative of persistence, love, and activism across the long arc of the black freedom movement.

It covers the modeling of population responses to management actions, the estimation of quantities needed in the modeling effort, and the application of these estimates and models to the development of sound management decisions. The book synthesizes and integrates in a single volume the methods associated with these themes, as they apply to ecological assessment and conservation of animal populations. Integrates population modeling, parameter estimation and decision-theoretic approaches to management in a single, cohesive framework Provides authoritative, state-of-the-art descriptions of quantitative approaches to modeling, estimation and decision-making Emphasizes the role of mathematical modeling in the conduct of science and management Utilizes a unifying biological context, consistent mathematical notation, and numerous biological examples

China, Africa and Responsible International Engagement Yanzhuo Xu 2017-10-06 China's increasing involvement in Africa is a controversial and hotly debated issue. On the one hand, China has brought significant economic and political opportunities to the continent with large amounts of investment and infrastructure. On the other hand, however, China's interests in Africa - including international strategy for

multipolarity, a boom in China-Africa trade, and a strategic focus on energy – have been challenged as a form of neo-colonialism with claims that support for authoritarian governments has come at the expense of human rights, the environment and good governance. This book analyses China's responsibility in Africa through the lens of good governance, China's African policy, policy implementation, feedback from host countries, and feedback from international society. Arguing for a new framework for evaluating China-Africa engagement, it looks at four countries – Sudan (South Sudan), Nigeria, South Africa and Ethiopia, all of which represent typical features of China-Africa relations – to test China's impact on the country and to analyse the factors in Africa that affect China's ability to shoulder responsibility. It proves that China's responsibility in Africa is affected by both the Chinese and African environments and that China's positive or negative impacts on the host African countries are largely constrained by the political and economic situation within the host state. Containing information from first-hand interviews with African officials, officials from China's Ministry of Foreign Affairs, employees from Chinese State-owned enterprises who have been assigned to Africa, and Chinese self-employers in Africa, and using fieldwork from three African countries, this book will be of significant interest to students and scholars of African and Chinese Politics, International Relations and Development.
