*The Productive Graduate Student Writer* Jan E. Allen 2019-07-02 This book is for graduate students--and others--who want to become more productive writers. It's especially written for those who want to: • increase their motivation, focus, and persistence to move a project to completion • overcome procrastination and perfectionistic tendencies • reduce (or write in spite of) their anxiety and fear of writing • manage their time, work, energy (and advisor) for greater productivity The process or craft of sustained writing is not a matter that's taught to undergraduate or graduate students as part of their studies, leaving most at sea about how to start a practice that is central to a career in academe and vital in many other professional occupations. This book grew out of conversations Jan Allen has held with her graduate students for over 30 years and reflects the fruit of the writing workshops and boot camps she has conducted at three universities, her own and numerous colleagues' experiences with writing and advising, as well as the feedback she receives from her popular Productive Writer listserv. While Jan Allen recognizes that writing is not an innate talent for most of us, she demonstrates that it is a process based on skills which we can identify, learn, practice and refine. She focuses both on the process and habits of writing as well as on helping you uncover what kind of writer are you, and reflect on your challenges and successes. With a light touch and an engaging sense of humor, she proposes strategies to overcome procrastination and distractions, and build a writing practice to enable you to become a more productive and prolific writer. Jan Allen proposes that you read one of her succinct chapters – each devoted to a specific strategy or writing challenge – each day, or once a week. When you find one that increases your concentration, motivation or endurance, make it a habit. Try it for two weeks, charting the resulting increased productivity. It will become part of your repertoire of writing and productivity tools to which you can progressively add.

**Surviving and Thriving in Postgraduate Research** Ray Cooksey 2019-06-27 This handbook provides an in-depth exploration of the entire journey of postgraduate research in the social and behavioural sciences, from

enrolment to its culmination in the form of a thesis, dissertation or portfolio, and beyond. It is written in an accessible and example-rich style, offering practical and concrete advice in virtually all areas. It also includes references to additional resources and websites, and each chapter features key recommendations for improving the postgraduate research experience. The book addresses not only research-related aspects (e.g. supervisors; selecting your guiding assumptions; contextualising, framing and configuring research; reviewing literature; sampling; writing proposals; ethics and academic integrity; selecting a data gathering strategy; surviving your thesis/dissertation/portfolio examination; and publishing), but also questions concerning how to integrate, manage, and balance the research journey in the context of the postgraduate student's broader life-world (e.g. skill development and supervisor relations; effective time and project management; a healthy work-life balance; maintaining motivation; and dealing with criticism). The book adopts an explicitly pluralist perspective on postgraduate research, moving beyond mixed methods thinking, and offers concrete examples from postgraduate students' real-world experiences.
